Shaul—Woodley.

A wedding took place on Saturday evening at the home of the bride's parents, in the Holborn district, when Marjory Kathalean, daughter of Mr and Mrs H J Woodley, became the bride of George, second son of Mr and Mrs A J Shaul.

The bride entered the room on her father's arm, to the strains of the Bridal March from Lohengrin, played by Schleecker Bros.

Miss Jane Taylor acted as the bridesmaid, and Mr L Woodley, a brother to the bride, assisted the groom.

The ceremony was performed by Rev W E Sieber, with the couple standing under an arch centred with a wedding bell. After the service they received the congratulations of their relatives and friends.

The bride wore a gown of white satin and lace, princess with a flowing veil crowned with a wreath of orange blossoms. The groom's gift to the bride was a necklace

set with pearls: to the bridesmaid a bracelet; to best man a set of golden cuff links; bride's gift to the groom, a stickpin.

After the marriage ceremony the guests proceeded to the dining room attractively decorated with wedding bells. The table was centred with a 4 tier wedding cake. A delicious wedding banquet was enjoyed by all, with toasts to the happy young couple.

Among those present were Mr and Mrs H J Woodley, Mr and Mrs A J Shaul, Mr and Mrs B Woodley, Rev and Mrs W E Sieber, Mr and Mrs Misener: Viola, Cecil and Leonard Woodley, Chas Shaul, Mr and Mrs D Sutherland, Mr and Mrs A Propp, Mr and Mrs Mickelson, Mr and Mrs H J McDonald, Mr and Mrs T Scott, Mr and Mrs A Anderson, Mr Duval, Miss E Anderson; Mary and Herman McDonald, Henry and Wm Schleecker, H Aubrey, Helen Gronson.

The happy couple were the recipients of many beautiful gifts. Their many friends in the community wish them every happiness in their home at Rosenthal.

Junior Basketball Notes.

The Stony Plain junior basketball club held a reorganization meeting on the 6th inst. when the following were elected officers:

Pres, Rachel Willie
Sec-treas, Vera Peters
Captain, Marg, Pailer
Coach, Henry Trapp

The personnel of the team is— Guards, Erna Michael, Vera Peters; Centre, Elsie Fuhr; forwards, Rachel Willie, Marg, Pailer; Subs, Martha Goertz, Edna Zucht, Blanche Rieser; Mascot, Mary Gannon.

For the purpose of raising funds, the club intends holding a whist drive; the date of same to be announced later.

The girls say that they intend to go over big the coming season, and are now arranging for games with outside teams.

To start the season off, they will have a game with Garden Valley.

The Inga Office Going West.

On Tuesday next, April 18, the Councillors of Inga M. D. meet in Stony Plain for possibly the last time, as arrangements have been made to move the office of the Secretary west. It is stated that Mr Joe Best, the newly appointed Secretary, is building an office at his farm on Jasper Highway, near Duffield Corner, which will accommodate the councillors for their meetings, and where the Secretary will be found at other times. Inga's lease on their present office in the Telephone building here expires on April 30, and it is probable the office here will be closed after that date.

The Tuesday meeting will be the last one held by the councillors until after seeding operations on the farms, when notice will be given of the date of the meeting.

Patent Issued to Local Farmer

A local farmer who has been experimenting for several years with a new gadget on his steam engine, has had the pleasure of receiving a patent on it, from the Patent Office, Ottawa. The lucky farmer is G J H Dairmont, who farms four miles west of Stony Plain.

The invention is a high compression steam device, and is designed, as a boon to farmers, providing a cheap, quick way of generating steam for power and heat. The principal part of the device consists of a heat chamber around which there are a number of small concentric tubes. The invention eliminates the necessity of a heavy boiler for operating with steam at high pressure and only uses cord wood as fuel. The inventor has made a practical test of this device over a long period, and finds he can get up steam in from 2 to 4 minutes and reduces costs to practically nothing for heating his home and providing power.

Now Adolph!

Meet August Reiminschneider and Adolph Krausemiller at Moose Hall next Monday evening, the 17th, as these two are the principals in the play "Now Adolph!" being given under the auspices of the officers and members of Stony Plain Town Band. The cast of characters comprises about a dozen people, and the play is said to be full of situations sure to give rise to gales of laughter.

The play will be followed by a dance, with good music and low admission charges.

Nature Cannot Be Defied.

It is recorded in Holy Writ that God created man and gave him dominion over all the earth, over the fish of the sea, the fowl of the air, over every living thing that moveth upon the earth; in a word, over every thing wherein there is life, including all fruit and seed bearing trees and plants. In his conquest and control of these things man has waged, and must continue to wage, a never-ending battle, and he has waged it, on the whole, successfully and with increasing efficiency as the years and centuries have come and gone.

Enforcing his dominion over every living thing, and as a means of exercising control over them and to secure for himself the maximum of benefits and comforts therefrom, man has gone further afield and assumed control over many of the forces of nature. He has overcome the obstacles of mountains by driving tunnels through them; he has bridged great streams and gorges; he has "damned mighty rivers to obtain power; he has delved into the bowels of the earth for fuel and minerals to serve him; through his inventive genius he has overcome the handicaps of distance and space, making both the sea and the air serve his purposes.

Still not content, man has attempted to control other laws of nature over which he was not given control and which, despite all his efforts, are ever and will be beyond his control. As a result of jealousies and rivalries developing as mankind increased in numbers, men quarrelled and fought among themselves. They divided into tribes, and later into nations, developing distinct national traits of character and ambitions, each selfishly endeavoring to secure to itself a larger measure of control over the earth than that enjoyed by their rivals, and constantly warring with each other to obtain and retain such control.

The world was created for man,—the whole world for the whole race of man. Its climate was varied, and with variations in climate there is variation in products and methods of living, each part having something to contribute to the welfare of man in other parts, and all going to make up a completed whole. But man developed narrow tribal and nationalistic instincts and ambitions, lived himself off in groups into compartments, and sought to live unto himself, self-satisfied and self-contained, apart from the rest of the world. Such a mode of living might succeed for a time, but man was simply punishing himself, denying himself many of the benefits and comforts which an untrammelled nature intended he should possess and enjoy. The whole race of mankind is now paying the penalty for that great error.

This primary error led to many others, and man set his ingenuity to work to overcome the difficulties he had himself created. Having defied one great law of nature he thought to correct that mistake by defying other laws. He conceived the mistaken idea that he could, by the mere enactment of his own man-made laws, substitute artificial political boundaries for the natural boundaries as defined by geographical facts. He had changed the course of rivers, why could he not change the streams of man's intercourse, communication and trade with solid ground under their feet. He had changed the areas of the world's surface intended by nature for agricultural pursuits into great manufacturing centres? Where nature designed that communication and trade should flow north and south, with one section the complement to the other, why should not man order otherwise and force communication and trade to flow east and west in order that it might be confined within certain narrow political divisions set up by himself in defiance of nature's laws?

Man thought he could do it, and he proceeded to try, with the result that the whole race of man is today mired in a morass of its own making. All men and all nations are floundering with no solid ground under their feet. In their difficulties and desperation they still blindly rely upon the enactment of one man-made policy after another, each a further defiance of nature's immutable laws, to get them out of their trouble, instead of frankly acknowledging their initial mistake, wiping out their narrow nationalistic policies, and allowing the laws of nature to operate freely without restriction or attempted control by man, who, after all, cannot control them.

Man was not created to be so ordered and controlled. He was given a body, a mind, a soul of his own. He was to have dominion over all things; not things, even a State created by himself, to have complete dominion over him. It has been tried before in this old world's history and it failed, as it always will. It is being tried again today under Fascism in Italy and Germany, under communist socialism in Russia, under other forms of despotic government in so-called less enlightened countries. It may abide for a time, but it will fail sooner or later. And it will fail because man is an individual, with a mind and soul of his own. His initiative will not be denied. Man will eventually get back to recognition and observance of nature's unchangeable laws. Then, and then only, will he again achieve happiness and contentment.

Scotland At Grain Show

Scottish Entry For Grain Exhibition At Regina

An entry of high quality oats, from a farm owned by same family for over 60 years, will be a challenge to the oat farmers of Saskatchewan at the forthcoming World's Grain Exhibition at Regina.

Officials of the exhibition announced that an entry has been received from Mrs. Maggie Eccles, of High Pimmore, Maybole, Ayrshire, the sample being registered in the oat section.

Mrs. Eccles operates a 230-acre farm close to the birth place of Robert Burns, the poet, and the farm has been in the same family for over 60 years, special attention being paid to oat production.

A long list of exhibition successes over a number of years is Mrs. Eccles' record. In 1931 she won the gold medal for grain at the national stock and grain show at Edinburgh.

Sugar Elevators

Raymond the First Place in Canada To Adopt This Plan

Sugar from this famous sugar beet growing country will be stored in elevators in the same manner grain is stored. Raymond, Alberta, is the first place in Canada to take such a step.

The Canadian Sugar Factories, Ltd., announced that they would build four elevators at a cost of \$50,000 for the purpose of storing the sugar produced in the Raymond area. Each elevator will be 30 feet in diameter and 125 feet high.

Scotland has a serious crime wave.

BABY SCALDED! Quick! Get the MECCA OINTMENT

Stop the pain and agony by applying Mecca Ointment at once. Prevents inflammation, averts tissue destruction, and quickly starts safe healing. Keep a supply of Mecca Ointment in the home to meet all emergencies. It is the magic cream applied to burns and scalds. Mecca Ointment is sold by all Druggists—35c; 50c (tube); 50c and \$1.00.

Britain Rich In Minerals

Practically Every Known Metal Is Found In Empire

The news that the vast bends of iron ore in Northamptonshire are to be worked on a great scale calls to mind the fact that Britain is still one of the richest metal-bearing countries in the world. This remains true despite the fact that during the past half-century, the total value of minerals raised in Great Britain was about three thousand five hundred millions of pounds. Of this, coal represents about two-thirds; the rest comprises nearly every metal or mineral in common use and a number of the rarer ones. Cornwall and Devon still produce tin. Immense quantities of rich tin ore lie below the surface, but so far below it that at present the mines cannot compete successfully with the shallow tin dredgers of Malaya and the open workings of Bolivia. Cornwall, too, has copper, antimony and arsenic, to say nothing of radium. There is a reef of gold-bearing rock under the Forest of Dean which contains enough gold to pay Britain's national debt. Under present conditions, however, it does not pay to work it.

Worthy Of Consideration

Banning Jazz From Radio Broadcasting Is A Good Idea

Chancellor Hitler has banned jazz music from the Berlin broadcasting station on the ground that it is not a cultural factor.

The idea is worthy of consideration elsewhere than in Berlin. The childish tum-tum of the jazz orchestra, its senseless dissonance, its blaring and blustering and blatancy, combined with its horrors of cacophony that are enough to make all dead composers of melody turn in their graves, stamp it as a production of the lower orders of human intelligence.

Jazz has enjoyed a long—a far too long—life as a popular craze on this continent and in Europe. But from all quarters reports have been pouring in for a year or so to the effect that its popularity is on the wane; and there is ample evidence that this is the case. Such a patent proof of a return to cultural ideals is welcome on many grounds, but on none more vitally than that it presages the abolition from the home of one of the most insane, discordant and inartistic forms of noise yet conceived by humanity.—Montreal Star.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save on clothes is by renewing the color of faded or out-of-style dresses, coats, suits, and underwear. For dyeing, or tinting, I always use Diamond Dyes. They are the most economical ones by far because they never fail to produce results that make you proud. Why, things look 'better' than new when redyed with Diamond Dyes. They never go streak, or run. They go on smoothly and evenly, when in the hands of even a ten year old child. Another thing, Diamond Dyes never take the life out of cloth or leave it limp as some dyes do. They deserve to be called 'the world's finest dyes'!"

S.B.G., Quebec.

Favor Sterilization Plan

Stand Taken By Lieutenant-Governor Of Ontario In Comment

The Toronto Local Council of Women and several clergy members joined in expressing appreciation of the stand on behalf of sterilization of the mentally unit taken by Dr. Herbert A. Bruce, Lieutenant-Governor of Ontario.

On recommendation of Mrs. R. G. Smythe, mental hygiene convener, the local council of women wrote Dr. Bruce acclaiming his stand. Mrs. Smythe said what the province wanted was permissive and selective sterilization of the mentally unit.

More than 8,900 applications for patients were filed in Czechoslovakia last year.

That is the question . . . until you discover how easily you can roll a more enjoyable cigarette with Ogden's Fine Cut Cigarette Tobacco.

Easy rolling! Yes, but that's only half the story. Wait 'till you light up! Then you'll know why Ogden's Fine Cut has become first choice with so many men who roll their own.

Ogden's Fine Cut is a real cigarette tobacco . . . the kind that sells on its merits. No need to take our word for it. Just try a package . . . use "Chanticleer" cigarette papers with it.

OGDEN'S FINE CUT

Your pipe knows Ogden's Cut Pipe

Good Ads Always Pay

Give Their Daily Message To the Buying Public

"Good advertising will sell goods even in bad times," says Louis Tanenbaum, production manager of R. H. Macy & Co., the famous department store of New York. The Macy executives have proved it to their own satisfaction. In their recent anniversary sale they found that well planned advertising brought crowds to the big store.

Experienced executives of successful stores know that "good ads always sell." That is why they keep hammering away, telling their message to the people day after day.

For Creamed SOUPS and SAUCES

If you have not tried St. Charles milk you will be surprised at the improved flavor it gives to cream soups and sauces. It is healthy and economical too and with it you can make hundreds of tasty dishes that you and your family will enjoy.

Always ask for St. Charles by name and then you can be certain that you are obtaining the best evaporated milk.

Jasper National Park, Great Alberta Reserve, Is Outstanding Game Sanctuary

Jasper National Park in Alberta, Canada, is today one of the greatest wild life sanctuaries in the world. Here, in an area of 4,200 square miles, many species of wild life live free from human molestation. At the time white men first entered this region, a little over a century ago, big game was plentiful. Bighorn sheep and Rocky Mountain goat fed on the hillsides, deer and elk ranged the valleys, and the flats a few miles south of the present Jasper townsite were frequented by buffalo. The whole country was a rich hunting ground for both white men and Indians.

When Jasper National Park was set aside in 1907, by the Government of Canada to meet the recreational requirements of the people, and to serve as a refuge for the native fauna, great inroads had been made in the wild life by hunters. As a result of the establishment of sanctuary conditions the preservation of the different species of wild life indigenous to that region has been insured, and now hunters may feel confident of having an unending supply of game in districts adjacent to the park.

One of the chief attractions to visitors at the present time is the variety of wild life which may be seen along the motor highways and trails in the park. Bear, moose, elk, bighorn sheep and mountain goat may frequently be seen from a car, while caribou may generally be sighted in the high open passes of some of the nearby mountains.

In recent years there has been a remarkable increase in the size of the park. It is estimated that the number of bighorn sheep has doubled within the past few years in the Athabasca Valley. They are especially numerous at Pochontas, Interlaken, Brazeau River, Snake Indian Valley, Moose Horn, Creek and Southfork River. Rocky Mountain goat are numerous and are spreading to new ranges in the park. The largest herds of these animals are to be found at Shale Banks, Smoky River, Collin Range, Maligne Lake, Whistler Mountain and Circus Valley.

Elk, Moose, Deer and Caribou are seen in large numbers throughout the park. The elk, which had so nearly been exterminated a few years ago, have increased to such an extent that now they are extending their range in many directions. Reports state that they have been seen as far west as McBride, British Columbia, on the Canadian National Railways, which is one hundred miles west of the park. Moose are also increasing in numbers, especially in the northern part of the park, which is heavily wooded and well suited to the needs of this animal. Deer in the park are rapidly increasing in numbers. Caribou are spreading throughout the park and overflowing from the Smoky River area into British Columbia, as far south as the Canadian National Railways' line. The main herds are about Byng Pass, Twin Tree Lake, Tonguin and Circus Valleys, Smoky River, Brazeau Valley, Upper Snaring River, Dominion Creek and Maligne Lake.

There has been a large increase in the number of bears, especially in the immediate vicinity of Jasper. There are many beaver colonies in the park and the animals are increasing rapidly in numbers. The beaver constitute one of the numerous attractions at Lac Beauvert, where visitors in the evening hours catch glimpses of them in their home waters.

Millions Have Defective Hearing
There are approximately 3,000,000 people in Great Britain with defective hearing in one or both ears. This statement appears in a survey of two years' research by the National Institute for the Deaf and the Department of Industrial Physiology of the London School of Hygiene, published in the British Medical Journal.

An impacting machine developed in University of Toronto laboratories is claimed to greatly aid germinating of clover seeds through its action in breaking or weakening their hard shells.

W. N. U. 1989

Zoo Loses Ancient Tortoise

Pine Ends Career Of 150-Year-Old Reptile

London papers record the death from influenza of Sopa, the giant female tortoise at the Zoo. There is no doubt that her registered age, one hundred and fifty, is correct; there had been carved upon her undershell the year of the Peace of Versailles, 1783. This three-hundredweight reptile had been ill for some weeks. Recently pneumonia developed, and has now claimed her at her prime. The animal was a native of Galapagos Islands, off the coast of Ecuador.

In spite of her death, Sopa will continue to be an object of interest, since she is to be mounted for exhibition purposes in the galleries of the Natural History Museum at South Kensington.

By Ruth Rogers

AUNTIE SMARTNESS IN COAT- DRESS WITH A NEW BROAD- SHOULDER LINE

It's the sort of stunning little dress you can wear and wear, and feel smart in.

It slips easily under a coat and is as smart as paint without one when the warm Spring days arrive.

You'll have guessed that the original was in beige rough crepe with quite daring navy crepe for the collar, button and tied girdle.

If navy-blue crepe is your choice, it's just as snappy with coral-red trim.

Grey checked woollen weave is chic, with plain toning grey crinkly crepe silk collar and worn with a wide grey leather belt.

Style No. 558 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 18 requires 3 1/4 yards 54-inch, with 1/2 yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Eskimos Drink Alcohol

Civilization Ravaging Natives Of Victoria Island

"Civilization" is ravaging the Eskimos of Victoria Island. They have taken to drinking denatured alcohol, according to the report of Corporal Wall of the Royal Canadian Mounted Police.

In paying inter-tribal calls, this poison and methyhydrates are among the appetites passed around. The corporal fears if the practice continues it will seriously endanger the health of the natives.

Some redeeming features are noted, however. The influence of the missionaries is strengthening, and the Eskimo pride themselves not only in their hymn-books, but in their ability to sing these hymns.

"They observe Sunday very closely and will not do a thing, spending most of the day singing hymns, even if the camp is out of meat."

Humanitarian influences are now being borne in on the natives. Corporal Wall noted the average of the Eskimos families was three children, of whom there were as many girls as boys. The practice of letting the girl babies die in infancy is dying out, he says.

Has Ancient Lineage

Greyhound Probably Oldest Of Dog Family In World

The greyhound can boast of a very ancient lineage, and is probably the oldest of the dog family in the world. It figures on Egyptian frescoes of the early Pharaohs, and was used for coursing by Greeks. A fine Antoine sculpture in the British Museum of two greyhounds proves that they were appreciated by the Romans. Greyhounds were favorites with almost all English kings, from Canute to Charles the First, and King John repeatedly took greyhounds instead of money for payment of the penalties he inflicted. Until modern times the greyhound was an aristocratic dog which only "gentlemen" freeholders were permitted to keep. A trace of this regulation can be found in the fact that in England until 1853 a special tax of twenty-two shillings each was levied on greyhounds to place them beyond the reach of all except the favored few.

Notice Averted Nothing

Idea Of English Vicar Did Not Save His Apples

A vicar who had a nice orchard attached to his vicarage was rather perturbed when he learned that soldiers were coming to camp in the field close by. He put a card against one of the trees with the inscription:

"Please do not touch the apples. We want them for the Harvest Festival."

The soldiers arrived, and the next day when he went to the orchard he found that all the fruit had been stripped from the trees. The card had been reversed, and the following substituted for what he had written:

"All is safely gathered in, ere the winter storms begin."

BRITAIN LAUNCHES THE "STARFISH"

Our picture shows the launching of the new British submarine "Starfish," sister ship of the "Seahorse," which were ordered in March, 1931. The "Starfish" and "Seahorse" were designed by A. W. Jones, C.B., C.B.E., the Director of Naval Construction. There are four vessels of this class and they are 187 feet long, 24 feet beam, with a standard displacement of 640 tons.

Work of Canadian Plant Breeders In Improving Quality of Wheat An Epic of Scientific Achievement

Dentists in Olden Times

Artificial Teeth Were Familiar In Time Of Caesars

Dentists played an important role in the ancient civilizations of Egypt, Assyria and Peru, according to Dr. Leroy M. S. Miner, dean of the Harvard Dental School.

Excavations among the Incas remains in Peru, Dean Miner said, revealed that the teeth of the Incas were ornamented with thin gold discs. In Ecuador, teeth were almost entirely covered by an overlay of gold. In ancient Mexico and India, they were commonly adorned with turquoise and other precious stones.

In an Egyptian document nearly 3,000 years old, archaeologists found remedies for toothache and for tightening loose teeth, and in the ruins of Nineveh was found a clay tablet, 2,500 years old, in which a court physician recorded his diagnosis of a royal toothache.

"By the time of the Caesars," declared Dean Miner, "artificial teeth were familiar. The Roman poet Martial notes with a sarcastic eye the efforts of the beauties of the day to maintain their charms and remarks that 'the belle lays down her teeth at night just as she does her slippers'."

"In another place he unkindly remarks that she now has removable teeth and would have removable eyes if they were for sale."

Women Have Pet Aversions

But Dislike Of Job Usually Varies With Individual

Every housewife has a pet aversion among her duties. This hated job varies with the individual. Such were conclusions of the members of the Women's Institute of Burton, England, which has just completed a survey on housekeeping. The president was positive about her aversion. It was getting up in the morning. Other dislikes were cleaning windows, spring cleaning, chopping wood, washing up, washing one's hair, darning, patching, cooking, cleaning boots and shoes and tidying grates. Three agreed that skinning rabbits was the worst. Two others said it was cleaning chickens. Another disliked keeping meals waiting, and an old lady declared that she "detested everything."

A Northern Outpost Of Agriculture
Agriculture is being successfully carried on 185 miles northwest of Prince Albert at Beauville, Sask., on the Beaver River. At that point there is a well-equipped farm producing cereals, vegetables, hay and tobacco for the use of the local mission. This locality is shown on the 11-a-l-a-Crossing sheet, issued by the Topographical Survey, Department of the Interior, Ottawa.

"The contributions made by Canadian plant breeders in the form of superior varieties of field crops stand almost as an epic in the realm of scientific achievement," stated L. H. Newman, Dominion Cerealist for the Canadian Government Experimental Farms, in a recent address broadcast over a chain of Canadian radio stations. "These contributions," he continued, "reveal a story of nearly half a century of determined effort, replete with discouragement and disappointment but ultimately rewarded with enormous gains."

"The most important plant-breeding contribution made thus far in Canada has been in connection with the development of varieties of wheat capable of thriving under conditions which characterize much of the great wheat-growing plains of Western Canada."

"While the creation of an early-ripening, high-yielding variety of wheat of good quality has been a major objective of the Canadian plant breeder for many years, more recently he has been grappling with another problem of equal if not even greater importance. This wheat is an attempt to combine in one variety the yielding ability and baking quality of such varieties as Marquis with the ability possessed by certain non-bread wheats to resist the attacks of that dread enemy of the wheat grower, the disease known as wheat rust. This work, which is centered largely at the Canadian Government Rust Research Laboratory at Winnipeg, seems to be progressing rapidly toward the desired goal and it is confidently expected that within the next two or three years the momentous announcement will be made that a new rust-resistant wheat of high quality and good yielding ability is available for propagation by farmers in the affected districts."

A Record High Tide

Damaged Old Fortresses That Resisted Wolfe's English Invasion

The rock-ribbed old fortresses that stubbornly resisted Wolfe's English invasion has fallen before the onslaught of a storm that drove huge seas into Louisbourg's sheltered harbor, in Nova Scotia.

A record high tide breached a gravel barrier for the first time in 177 years and flooded a large part of the ancient fortifications, lapping the base of the famous French hospital in the surrounding grounds. The approach roadway to the main gate of the fort was practically ruined, and it is expected that restoration work on the remainder of the fort will have to be halted this year to allow it to be repaired.

The last recorded occurrence of the kind took place in 1764—two years before Wolfe took Louisbourg—and caused the French authorities much trouble. Sentries had to be withdrawn because the water rose up to their waists.

Not Much Of a Success

Airplane Wedding Was Found Too Novelty For Comfort

Marriage in an airplane may be a novelty, but it is not romantic, according to Mr. and Mrs. James Cusumaker, who were wed high above Sydney, N.S.W. The bride and groom took off from the aerodrome prepared to have their wedding broadcast to the world. The plan to switch off the airplane engines during the ceremony, was found impracticable. Rev. H. Mills, of the Dulwich Hill Congregational Church, had to shout, the bride and groom had to shout their "I wills," and the radio announcer almost shouted himself hoarse. The couple had to grasp the rack above their heads several times to avoid being thrown out of the swaying plane during the ceremony. When the party reached the ground, Rev. H. Mills said he had had enough of airplane weddings, the motion picture operator reported that the Registrar General had stopped the filming of the ceremony, and radio listeners complained that they had heard nothing.

RECIPROCAL TRADE WITH U.S. OTTAWA RUMOR

Ottawa, Ont.—Events of the past few days have strengthened the belief here that a reciprocal trade agreement between Canada and the United States is in the making.

No official confirmation of this report is available, but it is not the custom of the government to make any disclosure while such projects are pending.

Hon. Percy C. Black, on his return from Ottawa to Halifax, said, with respect to the lumber industry, that the government had "other measures under consideration expected to be of great benefit to the industry in this province."

Observers here interpret this statement as an indication that the Nova Scotia minister referred to the possibility of restoration to Canada of a share of the United States lumber market, for many years the great outlet for the products of Canadian forests.

The fact Hon. W. D. Herridge, Canadian minister, to Washington, spent the greater part of March in Ottawa in close consultation with officers of the Department of External Affairs, adds weight to the rumors.

In the House of Commons some days ago, speaking of requests that certain commodities, including lumber, be included among those to be assisted by the export stabilization fund proposed in the budget, Prime Minister R. B. Bennett observed there were other means of assisting these industries.

The tariff commission announced recently that President Roosevelt has issued his first proclamation, under authority of the flexible tariff law, calling for a decrease in duties on certain agricultural hand tools. The president ordered a decrease in the duty on hay forks and four-tined fertilizer forks from eight cents each to four cents each and 22½ per cent ad valorem, the maximum decrease possible under the flexible law.

Investigate "Akron" Disaster

U.S. Naval Court Will Make Searching Inquiry

Washington.—Minute and searching inquiry into the destruction of the U.S.S. Akron will be opened at Lakehurst, N.J., by a naval court of inquiry headed by Rear Admiral W. W. Phelps.

The court was ordered by Admiral William V. Pratt, chief of naval operations, after he and other high officials had heard a personal account of the tragedy from the only three survivors, Lieutenant-Commander Herbert V. Wiley, Richard E. Deal and Moody E. Erwin, enlisted men.

From naval craft searching hundreds of square miles off the New Jersey and Delaware coasts came reports of "no luck."

But Pratt sent out new orders to keep up the search until "there can be no thread of hope."

He ordered the submarine rescue ship "Falcon" to start dragging for wreckage. Pieces of the craft, he felt, might contain the vital clue to the cause of the crash, upon which the three survivors could shed little light.

Upon the court's findings will hinge, probably, the course to be followed by congressional investigations for which plans have been started. The wave of sentiment for abolition of lighter-than-air craft met a reaction in some quarters. A few congressmen spoke up against "hysterical" conclusion.

Belongs To Denmark

The Hague, Holland.—Denmark's title to eastern Greenland was confirmed by a decision of the permanent court of international justice in her favor in a dispute with Norway over its ownership.

More Jobs In U.S.

Washington.—William Green, president of the American Federation of Labor, in a statement, estimated that 230,000 persons lost their jobs in March bringing the total unemployed "well over 13,000,000."

History-Making Conference

Ramsay MacDonald Plans Early Visit To Washington

Washington.—President Roosevelt laid plans for a history-making conference here soon with Prime Minister Ramsay MacDonald, while his special envoy, Viscount Halifax, moved to learn how far the Hitler regime in Germany will co-operate for world disarmament and economic recovery.

From London came the word that the Prime Minister looks favorably on the idea and is making provisional arrangements for sailing about the middle of the month.

Meantime, word came to the state department that Davis is going to Berlin from Paris, Friday, to talk with Adolf Hitler's foreign minister, Baron Konstantin von Neurath. Davis will discuss matters limited to disarmament and a date for the economic conference.

Hitler's rise to dictatorial power at the head of a strong Fascist movement had led to fears in some quarters that the nation would seek to re-arm in defiance of the Versailles treaty.

London, Eng.—J. Ramsay MacDonald, Prime Minister of Great Britain, plans a speedy Easter-tide mission to Washington. It was learned Mr. MacDonald will confer with President Franklin D. Roosevelt and his aides regarding troublesome European and world problems.

Remaining in Washington only a few days, Mr. MacDonald will return to London soon after the House of Commons reassembles April 25, prepared to preside at the World Economic Conference, to push his disarmament plan at Geneva, and to continue the European pacification scheme inaugurated with Premier Mussolini at Rome last month.

Surtax On Higher Incomes

B.C. Bill Imposes Additional Tax On Amounts Over \$5,000

Victoria, B.C.—A bill providing for a sur-tax on higher incomes imposes an additional tax of one per cent on incomes of \$5,000 and up to \$7,500, and is increased by one per cent every additional \$2,500 up to \$47,500, when a maximum levy of 18 per cent is reached, to apply on all incomes in excess of that amount.

By the terms of a bill to amend the Income Tax Act, every corporation will be compelled to furnish to the commissioner of taxation a return of all dividends and bonuses paid to its shareholders or members during the preceding calendar year. The return must be made on or before the last day of February.

Flee From Germany

Prof. Einstein's Daughters Leave Germany For France

Coch-Syr-Mer, Belgium.—Prof. Albert Einstein's two daughters have fled from Germany, the scientist declared.

The younger daughter, who is married to a Russian, left Germany for France. Her sister, the wife of a German, left Berlin secretly and has arrived at the town of Scheveningen in southern Holland.

Mrs. Einstein learned that the elder daughter had fled when she telephoned her home in Berlin and was told by a weeping servant that her mistress had fled secretly for the frontier.

Younger Jap Training Ships

Victoria, B.C.—Twenty-one guns from the signal tower at Esquimaux barked a formal welcome to the Japanese training ships, "Iwato" and "Yakumo," when they arrived in Esquimaux harbor. Shortly after they dropped anchor more than 1,000 sailors were given shore leave and crowded the streets of the city.

To Aid Livestock Men

Ottawa, Ont.—A general survey of foreign markets by a livestock export commission was suggested in the House of Commons by Earl Rowe, Conservative member for Dufferin-Simcoe. There was no hope for economic stability in Canada until agriculture regained its feet, declared the Ontario livestock breeder.

MAY RECEIVE APPOINTMENT

It is understood that Sir Frederick Sikes will shortly have completed his term of office as Governor of Bombay and that J. C. C. Davidson (above) Chancellor of the Duchy of Lancaster may succeed him.

Peace Club Plan

Premier Mussolini, Of Italy, Says Plan Must Remain Intact

Rome, Italy.—While the French Government was drafting what reportedly is a revised peace project to submit to Premier Mussolini, of Italy, Il Duce has issued an advisory notice that the fundamental provision of his "peace club" plan must remain intact.

Premier Mussolini's statement was issued through the grand council of Fascism, his highest advisory body, after a late night session.

It declared his recent suggestions, asking for collaboration by France, Germany, and Great Britain for peace, are the only bases on which "peace or equality" can be built.

At the same time, the conviction was expressed that "through the work of clarification already initiated," the plan will find in the leaders of the government "the same comprehension that already has been shown by the people."

The council said it felt sure that the formation of a new political atmosphere will make a fruitful international collaboration also possible in the field of economics.

Hon. Frank Oliver Mourned

Crowds Attend Funeral Of Edmonton's Best Known Citizen

Edmonton, Alberta.—All Edmonton mourned when the funeral of its best known citizen and the west's greatest champion—Hon. Frank Oliver, was held. Following a simple but impressive service in First Presbyterian Church at 2:30 p.m. a lengthy procession travelled to Edmonton cemetery where burial took place in the family plot.

Rev. A. R. Osborn pronounced the last earthly rites for the pioneer, statesman and publisher. There were four massed choirs.

Here is pictured the historic meeting between Premier Ramsay MacDonald (left) of Great Britain, and Premier Benito Mussolini, of Italy, when they met recently to confer on a plan to preserve the peace of Europe. The photo was made as Il Duce greeted the British Premier on the latter's arrival at Rome from Geneva by plane. Following this meeting Premier Mussolini announced his Four-Power plan for a five-year disarmament holiday.

Lift U.S. Gold Embargo

President Roosevelt To Permit Free Exchange Under License

Washington.—President Roosevelt ordered the return of all gold over \$100 held by individuals to the federal reserve system before May 1.

In the same executive order, the president authorized the secretary of the treasury to issue licenses permitting the use of gold in necessary domestic and foreign trade transactions.

For violation of the order the president decreed a maximum fine of \$10,000 and imprisonment of 10 years, or both.

The order was issued to get such gold as is still in hoarding and to ease the national embargo to permit legitimate transactions under federal license.

The president will continue the firm executive hold on the gold supply of the United States to prevent foreign raids or domestic hoarding, but otherwise the gold embargo will be lifted.

By the order the secretary of the treasury is authorized to permit its free exchange again under a licensing system.

Fight Grasshopper Plague

Manitoba Taking Measures To Combat Expected Outbreak

Winnipeg, Man.—Plans are being made to combat a grasshopper plague of alarming proportions in Manitoba next summer, Hon. D. G. McKenzie, Minister of Agriculture, told the Manitoba legislature when estimates for his department were under consideration.

The most effective forms of bait have been chosen and sources of supply arranged. Mr. McKenzie said. Surveys of areas of infestation from egg deposits were completed last fall by Dr. Norman Criddle, Dominion entomologist, and a good idea was obtained of the areas where the outbreak of grasshoppers is likely to be most serious.

The amount of money needed to combat the menace could not be estimated this early, Mr. McKenzie explained. It might be between \$30,000 and \$40,000. Premier John Bracken indicated a bill may be brought in before the end of the present session.

Decrease Wolf Bounties

Bootlegging Of Furs From Manitoba And Quebec Bother Ontario

Toronto, Ont.—Induced by an epidemic of wolf-pelt bootlegging from Manitoba and Quebec, a bill will be introduced to the Ontario legislature cutting the wolf bounty from \$25 to \$15, by Hon. G. H. Chalmers, provincial secretary. Since the first of the year, Mr. Chalmers said, more than a dozen cases of Manitoba wolf skins had been passed off on the department of game and fisheries as Ontario-taken. Manitoba has, it is understood, eliminated wolf bounty payments.

BRITAIN PLACES EMBARGO ON RUSSIAN GOODS

London, Eng.—The House of Commons gave second reading to the government's bill authorizing executive declaration of an embargo against Russian goods, after turning down a Labor motion for its rejection by a vote of 347 to 48.

Opposition Liberals refrained from voting.

The government tabled in the House of Commons a white paper in which Sir Esmond Vane, British ambassador to the Soviet, told his own story of the arrest in Moscow of six British electricians on charges of sabotage, describing conditions in Russia as a "reign of terror."

The ambassador described in these words an interview with five other prisoners:

"While the prisoners seemed generally in good health the drawn expressions of Thornton and Cudney gave me a definite impression of their having been 'put through it.' They were all obviously terrified of speaking and replied themselves to a minimum of questions."

On March 16 Sir Robert Vansittart telegraphed Sir Esmond the substance of a conversation he had with the Russian ambassador to Great Britain.

In that conversation, he said, he was shocked to learn that there was a wide-spread feeling in the United Kingdom that the charges against the six engineers were grotesque, hysterical, "a stage performance, and a very bad one at that, intended simply to disguise, by serving up scapegoats, the success of certain industrial undertakings in Russia."

In a stormy debate in the House of Commons over the bill giving the government wide powers to act in breaking trade relations with Russia, Sir Stafford Cripps cited various authorities on international law to show interference by way of reprisal was only justified when the accused had exhausted all means of redress before all the courts of the country in which he was detained.

"Do you want to wait until they are shot?" shouted a voice amid a storm of Conservative interruptions.

Sir Esmond described his attempts to secure specific information on the nature of the charges against the men and to ascertain if they would get a public trial.

He told of an interview with Alan Monkhouse, director of the company, in which he learned Monkhouse had been questioned continuously for 19 hours after his arrest. At 3 a.m. he said Monkhouse was allowed to go to bed, but was aroused again at 7:30 the same morning and questioned for another 17 hours. He added good meals were provided, but that the questioning proceeded while the prisoner and his examiners ate.

Inquiry Is Ordered

Cattle Export Trade To Be Investigated By Committee

Ottawa, Ont.—Decision to launch an inquiry into the export cattle trade by a committee of the senate means the cattlemen of Canada will have their problems thoroughly aired at the present session of parliament.

A committee of the House of Commons is already busy investigating the milk trade and the dairy branch of the livestock industry.

The inquiry followed a proposal advanced by Senator D. E. Riley, of High River, a veteran cattlemen himself.

Worship 'Planes

Hillmen In Mount Everest District Experience Change Of Heart

Purnea, India.—Hillmen of this country kneel and worship the 'planes of the British expedition which flew over Mt. Everest and Mt. Kanchenjunga. When the first 'planes were sighted the hillmen believed the mountain deities would punish them for incursion upon their realm, but having watched the 'planes in their remarkable ascents, they have experienced a change of heart and now worship them as they pass overhead.

The Ex-Sheriff's Adventure.

The weather being propitious that evening, there was a fairly good gathering of members of the Chair Warmers' Club on Friday. Various topics were being discussed in a desultory manner, such as the opening of the ball season, and if the Flycatcher would be in command again; when the mayor would tee off the first ball on the Municipal golf links; who killed Cock Robin; and if we are to have a Dominion Day celebration in Stony this year; in fact the gabfest was in full swing when in walks Ex-Sheriff Old Humtut.

Someone asked Old Hum if he had heard about Pete Baron being nearly drowned a few weeks ago. Old Hum emerged from the smoke screen caused by his tramp steamer pipe, and remarked:

"H-e-r-r! Youse fellows seem to think Pete had a narrrer 'scape, but youse oughtta know a feller couldn't get drowned in say of 'em swamps out there, which aint got no more water in 'em than a heavy dew'd make. I remember once, up at Blueberry Lake; I was a walkin' across on the ice an' steps on a loose cake, when go plunk! I down I goes into what they calls the icy depths; an' sure thinks I was headed for a watery grave. I bet me glove but didn't lose me presence of mind an' jest kep' on swimmin'."

"Poosy soon," continued Old Hum, after expostulating, "I gets to bottom, but didn't hev much time to look around when I starts to bob up thru the water, an' by Heck I I come up under the ice an' gives it quite a bump with me cranium; when down I goes again. This time I sees a five-foot saw that we'd lost the winter afore, so I tuoks that under me arm, and on the upward trip, I tries to swim for the hole I'd first come down, but misses it by a slight margin, and heads down, striking bottom."

"By this time I was slightly puffed, and, besides, me pipe was nearly out; so, taking a fresh grip on me cutty, I starts up, but, bad luck to it, I misses the hole again; so, standing up there with me head agin' the ice, I takes the saw from under me arm an' saws me way up to fresh air; an' just in time, byegone! for a farmer with a sleigh was passin' and I hops in, and tuoks me long laigs into the straw till I gets home."

Old Hum stopped for a spell to take a long draw from his narghile then added: "I gess that puts it over the alleged drowning yarn from the Rosenthal goose pastures."

Ninety Years of Commercial Fertilizers.

The first manufacture of artificial phosphate was made in 1842, when John Bennett Lewes took out a patent on superphosphates. In those days there were many practical farmers who refused to believe that artificial fertilizers made in a factory and sold in bags could possibly do anything but poison the ground. Wren-Hoskyns describes this attitude well. "The smiles, winks, murmurings, shakes of the foreboding head and other demonstrations, jocular and serious" when the manure was "sown"—a ludicrous idea to the old men of the times. But the developments of science have ensured an abundant supply of artificial fertilizers at a cheap rate, and with widespread appreciation of their value, there has been an enormous increase in their consumption. The world's consumption is now no less than 40 million tons per annum, valued at \$770,300,000, an amazing development from the little heap of superphosphates made 90 years ago in the barn at Rothamsted and tested on the crops growing outside.

CHAPTER VIII.—Continued.

Presently Haskell turned around, smiling pleasantly. "I was disgruntled about something when you first came in, corporal. You really have patrolled hard for several months. I'm sorry I snapped at you. You can have your three days off whenever you like. You want to start tomorrow?" And when Bill nodded eagerly: "Very well, I'll throw in the rest of this evening too. By the way, when you go past barracks ask Whipple to step down here."

"Snakes!" Bill breathed to himself, as he thanked Haskell and went out the door. "That Spring-heel Johnny must be winding up to ask a favor of me, or something. But I've got my three days to help Alan out. Lord, I hope Alan shows up during my free time. He might maybe let me go along on his trip."

With no suspicion of the ugly truth, he turned up the twilight slope. When Whipple came in, Haskell ordered him to close the door and roll down the window, to guard against possible eavesdropping. Then he tersely explained the situation. He added:

"Hardsack will probably steal some more gasoline and oil tonight. What he's already stolen isn't enough for a plane to do much manoeuvring on. I want you to watch him stealing that stuff so that you can later be a witness. He'll probably have time to take those drums only a couple miles from here tonight. Tomorrow he'll take all of it on to the place where he's to meet Baker. He's been sneaking it away little by little when he had the chance, and hiding it close by; but during his three days he'll take it to the meeting place."

You go down to the river bank now to those two tpees and get that Indian called Ogi-Tomax. You remember

her Hardsack thrashed him one time last winter for carrying a squaw-club and beating his wife. He's got a personal interest in this, he's just the man we want. Take a carton of my cigarettes with you and a little rum as a silehce present. I'll personally pay him five dollars a day. Do you understand so far?"

Whipple nodded. Haskell went on: "You and the Indian are to shadow Hardsack tonight and tomorrow. Find out where he's taking that stuff and where he's going to meet Baker. As soon as you do that, whip back here and report to me."

It was late the next evening before Whipple returned. He came back tired, bedraggled, but with electric news.

He and the Indian had watched Bill steal more gas and oil from the stores. They had shadowed him to the temporary cache two miles up the McKenzie. There he had loaded his canoe to the gunwales with the drums and cans and had taken them all to a big lake twenty miles on up the river.

He had cached the fuel on a headland called Goose Point; and was waiting there without the faintest suspicion that he had been trailed and was being watched. The Indian, lying low back in the willows, was keeping an eye on him.

As Haskell listened to the report, he forgot the haggard day and night just passed. He had scarcely dared hope for such news as this.

After careful thought, guarding against any slip-up, he ordered Whipple: "Go get your rifle and belt-gun. I'll take mine, too. We'll go up there in the launch. You can drive it. We'll capture Hardsack and those supplies. That'll be that. Then we'll wait there. The 'plane' will be alone in a couple days. We'll keep the launch in cover close by. When the machine lights down and they go ashore to get the supplies, we'll ram it and put it out of commission. Then we'll have Baker and this Featherfoot—and we'll put them where the dogs won't bite 'em!"

After his despair of their last week, after his helpless festering anger at Baker, it was a new lease on hope to know he was going to smash Baker's venture and throw him into prison and make his marriage to Elizabeth impossible! Baker was waiting all unknowingly into a deadly trap. Walking into arrest and criminal disgrace and prison. He would be lucky to get off with a sentence of two years. That was the statute minimum for his offense.

Buckling on his belt-gun, Haskell

snuffed the candles and went out of his cabin—on the easiest, most exultant, most deadly certain trip he had ever made.

CHAPTER IX.

Wings Over the Wilderness

On that first day of flight, as dawn broke full and the sun chased away a layer of gossamer clouds beneath the White Speedair, Alan looked down with marveling eyes at a strange panorama. Evergreen forestry, silvery lakes and silvery network of rivers far below, swam past at a speed to amaze him. In thirty minutes he was covering a distance which would take a whole day's hard travelling by canoe or komatik.

Knowing that if he and Buzzard showed up at a police post or larger trading center, it would mean a quick and sorry end of their flight, Alan planned to avoid such places religiously. He had a conviction that he and Buzzard were "wanted." They had left too many tracks in Edmonton—clues that would speedily be followed up. The police there, a wise live outfit, had certainly connected them with the theft of all that government property and had radioed instructions for their arrest.

Eventually he and Buzzard were going to be caught. It was as inevitable as sunset. Soon or late they would have to return to civilization and face the music. To Alan the worst of it was that Buzzard was going to pay a heavy price for helping him on this thankless job. For himself he did not greatly care; he hardly thought of it. . . . He was headed north again, on his last patrol, his greatest patrol.

As they worked on north, they made moderately good time, but only by incessant care and worry. Engine trouble caused them delay. Again and again they sat down on some unknown river or lake and sweated for hours over the old motor. Fuel was a constant problem. Avoiding Mounted detachments and Royal Signal corps stations like the plague, they dared stop only at wilderness-trailled spots where radios were unlikely and no police handy. They could never be certain of getting fuel, and what they did get was usually half kerosene.

Alan was looking forward to his rendezvous with Bill as the end of all this worry about gas and oil. Besides the fuel there at Goose Point, Bill had promised to cache some supplies up the Aloooska near Joyce's home.

Alan was fervently looking ahead to meeting Bill at En Traversé lake, to getting those precious supplies, to seeing Joyce again there on the Big Aloooska. All of his loyalty to the sister of his dead partner could not keep him from comparing Joyce's vital spirited personality with Elizabeth's leisure-bored enaid, and Joyce's two years of heroic sacrifice with Elizabeth's idle deliberated dependence. On their last evening, worn out by a day of engine trouble and head winds and blinding rains, they alighted in a little spruce-buried lake on Silvertip River, a short hundred miles south of Fort Endurance. Anchoring the 'plane, they paddled ashore, cooked a warm meal, and rolled up in their blankets for a few hours of desperately needed rest.

"Tomorrow's the day of days," Buzzard remarked, thinking of the supplies and a base to manoeuvre from.

"It's the day of days," Alan agreed, but he was thinking of Joyce running down the path, bareheaded in the sun, to greet them. Tomorrow he would know if she was safe. Tomorrow, after the rendezvous with Bill the White Speedair would be dropping down upon the Big Aloooska.

Buzzard was asleep almost instantly, but Alan, tossed in a useless attempt to sleep, finally got up, built a tiny fire, and sat beside it, thinking, a dead pipe in his teeth.

As he sat there under the solemn spruces, he tried to look steadily at his looming marriage to Elizabeth, and decided his course. No longer blinded by idealization of her as a girl, he saw now, with pitiless insight, that all along she had not wanted him unless he had a good income and was out of the North. She might love him as well as she had ever loved anybody; but to her he was not greatly more than a means of getting what she wanted out of life.

The prospect of marrying her, when his respect was gone, made Alan wince. And his respect was gone with a vengeance. Those moments in the cabin, when she offered herself to him, had been a shock and revelation. She had acted not out of excusable passion, not out of love, but as a guarantee that he would take that Victoria job. He thought of the incident with something of revulsion.

Now he was groping to see the honest and righteous thing for him to do. He wondered whether it would be courage, or a weak yielding to desire, for him to break with Elizabeth and sweep aside the obligations binding him. There was right on both sides, Elizabeth was waiting for him; he had promised to marry her and take her out; he had burned his bridges and committed himself to that Victoria job. Yet it was wrong to enter a loveless marriage that would bring tragic unhappiness. It was wrong to marry Elizabeth when his whole hearted respect and love went out to Joyce MacMillan.

In the lonely anguish of his thoughts he laid his decision more or less in the hands of time. He felt he must see Joyce again before he could take a decisive step. If he did capture these six criminals and so cleared his father, she would be grateful with all her heart. He meant to tell her about the tragic happening which had bound him to Elizabeth. If he could win back that old intimate comradeship with her and they could begin anew, then the righteous thing was to put Joyce's happiness above Elizabeth's.

(To Be Continued.)

Unemployed Turn To Placer Mining

Seven Thousand Men Are Combining
Placer Areas In British Columbia

One of the highlights of the British Columbia gold industry during 1932 was the active search that was made for placer gold, according to the Dominion Department of Mines, Ottawa. From the number of free miners' certificates issued, it is estimated that some 7,000 men, formerly unemployed, participated in this search. These men, it is stated, have scattered through the old placer areas, in the hope of making wages with the "gold pan" and "rocker." Experienced prospectors have been literally combing the placer areas, particular attention being given to the search for old pre-glacial and inter-glacial drainage channels. Reports of new discoveries of coarse gold, found underlying false bed rock are quite common in the old camps, such as the Caribou, Kamela, and other areas.

An inter-island air service has just been inaugurated in the Philippines.

WHOLE FAMILY WITH INDIGESTION

A mother of four writes:—"Myself and family of four all seemed to suffer from acidity, pains in the back, and other forms of indigestion. I suffered whatever I ate. But since we have been taking Kruschen (for the last three months) we can eat anything, and all enjoy our food much better. We never have a trace of acidity or pain now. I think it is wonderful—it has no upsetting results. Whatever we may have to go without, we could not give up Kruschen."—(Mrs.) M.K. Kruschen. Salts swiftly neutralize acid, takes all the torment out of it, and gently expels it from the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals. Kruschen will keep your inside clean and serene. Pure and invigorated blood will be sent coursing to every part of your body. You'll feel wonderfully energetic and well. As healthy and hearty as it is humanly possible to feel.

Little Helps For This Week

"Wait on the Lord, be of good courage and He shall strengthen thy hands, and I say on the Lord." — Psalm 127: 1-4.

"He giveth power to the faint, and to them that have no might He increaseth strength." — Isaiah 40:29.

Should we feel at times disheartened and discouraged, a comforting thought, a simple movement of heart towards God will renew our powers. Whatever He may demand of us He will give us at the moment the strength and the courage that we need. — Fenelon.

We require a certain firmness in all circumstances of life, even the humblest, and perhaps contradictions come in order to prove and exercise this. If we can only determine so to use them, the very effort brings back tranquility to the soul, which always enjoys having exercised its strength in conformity to duty. — Wm. van Humboldt.

The Easiest Way

The Fort William Times-Journal says one of the reasons why the world is so loaded down with debt is that it is so much easier to seek for new forms of taxation than to study new economies. Governments have much the same mentality as the fellow who gave a note in settlement of an account and then murmured, "Thank God that's paid."

Old Lady (to policeman)—"I've lost my canary. Would you mind notifying the flying squad?"

FOR ANY PAIN

Have you ever found any
quicker relief than this?

Anyone can take Aspirin, for doctors have declared these tablets perfectly safe.

And there is no quicker form of relief for any pain.

It is well to remember these things when anyone tries to persuade you to try anything in place of these tablets.

Aspirin may be taken as often as there is any need of its comfort: to stop a headache, throw off a cold, drive away the pains from neuralgia, neur-

tis, rheumatism, lumbago, etc.

Whenever you take Aspirin you know you are going to get immediate results—and you know there will be no ill effects. You know what you are taking.

Why take chances on some form of relief which may not be as swift—may not be as safe? The new reduced prices on bottles of 100 tablets has removed the last reason for ever experimenting with a substitute for Aspirin!

Aspirin is a trade-mark registered in Canada.

Was So Short of Breath Could Not Lie Down to Sleep

Mrs. E. J. Chernoff, Shoreacres, B.C., writes:—"I had been so troubled with shortness of breath I could not lie down to sleep."

I couldn't do any hard work, or climb the stairs, and had nervous and smothering feelings, and became very weak.

I tried all kinds of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Now... CHEVROLET OFFERS

**TWO Lines of Cars—TWO Price Ranges
ONE HIGH STANDARD OF QUALITY**

THINK OF IT. . . . A big, full-size, five-passenger, six-cylinder closed car—for less money than any similar car on the market! And it's a CHEVROLET!

First came the Chevrolet Master Six, welcomed as no other car has ever been since 1929. Now comes the Standard Six—and everybody is talking about this newest addition to the Chevrolet line!

It's a Chevrolet through-and-through . . . with the same basic quality that has given the Chevrolet Master Six first place in nation-wide sales ever since its introduction. Both Standard and Master Sixes offer you Fisher No-Draft Ventilation . . . Safety Glass windshields and ventilators . . . Air-Streamed Bodies by Fisher . . . Silent second gear and easy-shift transmissions!

And in the new Chevrolet Standard Six you enjoy this quality at the lowest operating cost in the world for a full size automobile—and at the lowest purchase price for a six-cylinder closed car! We're waiting for you at our showrooms. For here is a low-priced car that no buyer can afford to miss seeing—today!

CHEVROLET LOW PRICES

STANDARD SIX . . . \$723 to \$770

MASTER SIX . . . \$789 to \$977

DELIVERED AT FACTORY, OSHAWA, ONTARIO
(FREIGHT AND LICENCE ADDITIONAL)

SIX-CYLINDER ENGINE

It develops ample power, is mounted in flexible rubber, and is easily the smoothest six-cylinder engine in the field—reaching mile-a-minute speed with no annoying vibration or apparent effort. Among the quality features of the power plant are pressure lubrication, down-draft carburetor, and crankcase ventilation.

FISHER BODIES

The new Chevrolet Standard Six is one of the most beautiful cars on the road. Its Fisher Body has the new wind-stream styling and skirted fenders that characterize the Master Six models.

NO-DRAFT VENTILATION

With Fisher No-Draft Ventilation, each passenger can regulate exactly the amount and direction of the air entering the car. A screened coil ventilator is available when maximum cooling is required. Doors are of the over-hanging bottom type, completely eliminating drafts.

SAFETY GLASS

A Duplate Safety Glass windshield, sloping at the non-glare 10 degree angle, is regular equipment on both Standard Six and Master Six models. The ventilating wings are also made of Safety Glass.

PRODUCED
IN CANADA

**SOMMERFIELD & MAYER,
STONY PLAIN.**

Elephant Brand FERTILIZER.

Prices for 1933 are as follows:

**AMMONIUM PHOSPHATE,
\$58.30 per ton, cash, off car.**

**TRIPLE SUPER PHOSPHATE,
\$45.00 per ton, cash, off car.**

Time prices slightly higher.

Cost per acre runs from 70c.—\$1.20.

Fertilizer attachments are now handled by the I.H.C., Massey Harris, John Deere, and Cock-shutt for the newer models of their own drills. The Consolidated Mining & Smelting Co. make attachments for all drills, new or old, at \$3.50 per run, less 5 per cent for cash.

Orders should be in soon, to get advantage of car-load rate.

T. J. Hardwick Agent, Stony Plain

A Moving Story.

On Friday last a big movie truck, about the size of a summer cottage, arrived in Stony Plain, to take the contents of the Dodge residence to Edmonton. The chauffeur of the truck and his mate are said to have been given the use of the Highway for that day under a special permit from the provincial Dept. of Public Works.

When the truck packers had about completed their labors a uniformed traffic officer arrived on the scene and began an investigation. On looking over the plates and comparing these with the chassis, the officer appeared to be of the opinion that there was some irregularity. Whereupon he is said to have ordered the truck unloaded, and the truck was shoved into the backyard, the engine drained, and the license plates removed.

The truck driver, apparently, wished to return to the City, and he was accommodated by the visiting officer.

News of Rosenthal.

The R. A. club met Wed., April 5, with President Val Kotscherofski in the chair, and Secretary John R. Schlitt present.

Much important business was discussed and promptly dealt with.

It was decided to lagoon the baseball diamond by leasing an acre of land from Joe Hoffman.

The baseball team will also be flashing brand new uniforms, if the financial problem comes up to expectations.

Stony Plain and District

Tomorrow, Good Friday, being a public holiday, the places of business in Stony Plain will be closed.

Mr E A Holt has returned to Stony, after a lengthy visit in Vancouver.

"Count" Doborowski, who had spent the winter in this district, left Friday for the Coast, on a motor trip with friends.

Hot X Buns, the delicious kind, made from pure ingredients, are now on sale at Anderson's Bakery.

At the Convocation held this week Mr Lawrence Sieber was admitted to the ministry of the United Church.

A meeting of members of the Basketball Club will be held this (Thursday) Evg. at 9 o'clock.

BUTTER AND EGGS WANTED at The Royal Cafe.

Death of H. T. Walton

One of the district's old-time settlers passed away on Wednesday morning in the person of Mr H T Walton. Deceased had retired from farming a few years ago, and moved to a plot of land on Main St. North. He had not been in the best of health recently, but was out in the business district on Tuesday, chatting with old friends.

He was up and around on Wednesday morning, as usual, and did his chores. On completing these he returned to the house, took a chair and expired.

As we go to press, no notice has been given of the time of the funeral.

Mr John Armbruster has charge of the funeral arrangements.

Stony's Newest Mechanician.

Mr A Boice is the new mechanic at the Service Garage. Art is a native of Ontario, and had been employed at the General Motors plant at Oshawa for 6 or 7 years. Later, coming west, he had been with Edmonton Motors for several years. He is very conversant with every make of car the G. M. turns out, and specialises on Chevrolets and Oldsmobiles. He is a careful, competent workman, and your auto could not be placed in better hands than in need of repairs. See him at Sommerfield & Mayer's.

Co-op. Executive Meets.

A meeting was held in the U.F.A. Hall on Sat. Aft. of the executive committee of the Co-operative Association of Stony Plain Constituency, with President Propp in the chair. A number of matters in connection with the Co-operative business of the members was up for discussion.

Several delegates were present from wholesale supply houses, among these being Mr Green of the Edmonton Milling Co., which specializes in Apple Blossom flour; another delegate represented a big oil company. The representatives submitted quotations on goods used by the members, and their figures will be given due consideration they deserve.

Spruce Grove News

The Y.P.S. held their meeting in the church edifice last evening.

Mr and Mrs C Brabbins, former residents of the Grove but at present residing up at Westlock, visited with old friends here, over the weekend.

The L. A. of the United Church held their regular monthly meeting on the 6th inst, at the home of Mrs Wm McLeod.

Mr A McGavin, Edmonton, was a business visitor to the Grove on Saturday.

Mr Brian Piercy, Normalite student, is having a tryout as a teacher up at Stony's public school.

On Good Friday the congregation of United church at the Grove will join in the combined service at the Stony Plain United church.

Services will be held at St Joseph's church on Good Friday at 2 p.m.

Christine Callion of Callahoo is said to have filed a statement of claim in the Supreme Court for a divorce from Adolf Callion of Spruce Grove district, on the usual statutory grounds and cruelty. The husband is described as "a wealthy farmer," in the claim.

Elephant Brand Fertilizer in packages and bags, can now be had at the Spruce Grove Hardware.

Wm Hanke, just recently from the manufacturing district, is now sojourning in the Fort Saskatchewan district—by request.

Members of the Grove United church will attend the combined service at Stony Plain church tomorrow (Good Friday) at 11.

Capt. Gibson is giving a lecture on "Mountain Climbing" at Stony Plain on the 13th, at 8 p.m.

Services at St Matthew's Lutheran church for Easter season are: Good Friday at 10.15 Confessional service; at 10.45 Communion service; Easter Monday service 10.30.

There was a rumor in business circles this week that a Stony Plain business house intended opening a branch at the Grove, either thru purchase or renting new premises.

Brightbank Items.

Wedding bells are—once more—ringing in this district and at Hansen's Corners.

Miss Tina McKay, who has been with us for some time, will be leaving soon for Vancouver, B.C. The best wishes of her many friends here will go with her.

Mr J young and family were Sunday visitors at the Summerfield home.

The shadow social and dance held at Hansen's Corners recently by the U. F. Local was a huge success.

The many friends of Miss Susan Kyle, who has been on the sick list, will be pleased to know she is making a good recovery.
